At present we are supplying Approx 700- 800 MT (LABSA) material to various states such as Gujarat, Maharashtra, Chhattisgarh, M.P. Tamil Nadu, and Kerala of India to different parties.

Our Laboratory is fully equipped to conduct all the quality parameters of sulfuric Acid and LABSA.

We have our own tankers, as well as we have tie-up with transport companies, who can transport around 50 MT LABSA per day.

Capacity of LABSA plant

Our present capacity to manufacture LABSA is 75 MT per day and around 2275 MT monthly, based on 3 shift work, and we are in the process of expanding the capacity to 150 MTS per day

Raw material used: -
Linear alkyl benzene and Sulphuric Acid 98%

Storage capacity: -

Raw material- 450MT (LAB + Sulphuric Acid)
Finished Goods- 250MT (LABSA + Diluted Sulphuric Acid)

Testing facilities of LABSA: -

We have fully equipped Laboratory to conduct all the quality parameters of LABSA.

Quality testing used: - Photo electric Calorimeter/ Titration System and other equipment.

Specification of LABSA

An analytical report of LABSA is given hereunder:

a)	Physical Appearance	Light brown colour liquid
b)	Active Matters	90 +/- 1%
c)	Colour	20 - 25 K
d)	Free Acid	5.5 - 6.5%
e)	Moisture	3.0 - 4.0%

RADHA KRISHNA SURFACTANTS PRIVATE LIMITED

Regd. Office: 305, ALPINE GARDEN CITY, SAMARVANI, SILVASSA-396230.

CIN : U24297DN2019PTC005589

Waste acid produced and disposed off :-

The Waste Acid produced during manufacture of LABSA is in the ratio of 0.675.:1, i.e. one ton of LABSA produces 0.675 tons of Waste Acid. The waste acid so produced is being sold to fertilizer plants.

Compliance to ISO or any other certification

We are presently having ISO 9001 certification.

SAFETY IS PRIORITY FOR US -

Followings safety measures for running the plant smoothly are in place.

- Displaying the MSDS of the product for every concerned.
- Providing Ear plugs
- Fire extinguishers
- Frequent training on safety procedures
- Perform hydrostatic tests to check pressure safety equipment
- Protective eyewear
- Eye-washing equipment for splashes
- Protective suiting, including gloves
- Safety valves to regulate pressure

Our plant is equipped with fire safety system.

Environmental Compliance

We have obtained environmental clearance from Ministry of environment and also valid consent from Gujarat Pollution Control Board.

Our units are equipped with an excellent infrastructure setup, which include most modern production equipment, process and quality control equipment, continuously updated technical know- how quality managements and assurances systems. The quality system ensures that every batch of products confirms to all aspects, technically superior approach to analysis and measurements are constantly identified and implemented

Labor Law

We comply with all the labor legislation and don't employ child labor.

RADHA KRISHNA SURFACTANTS PRIVATE LIMITED came into existence in 2019 under the leadership of **Binay Chandra Jha**, with huge experience of 25 years in detergent industries and LABSA plant, with the experience and market expectation We were achieve below 25 Klett LABSA from initial setup of our unit. Today we can proudly claim to manufacture the lowest color LABSA (around 15-20 Klett) among all domestic manufacturers. The NDOM factor in our LABSA is also among the lowest in the industry. We had achieved NDOM levels of below 1%.

Due to continuous dedicated effort of Marketing Team, we have been able to double the turnover in last 3 financial year and we are further targeting to double the turnover for next 3 years.

We currently have a capacity to produce 24,000-30,000 MT/PA of LABSA 90%.
